

Guyot Prize 2024

University of Groningen, the Netherlands

Prof. Dr. Nina Kraus

The recipient of this year’s prestigious Guyot Prize is Prof. Dr. Nina Kraus (Northwestern University, IL, USA). The prize is awarded in recognition of her groundbreaking research on the neural mechanisms of auditory brain plasticity, which has significantly enhanced our understanding of the far-reaching impact of sound on the brain and overall health.

October 3, 2024

8:00 PM to 9:30 PM

Aula, Academy Building

Please join us for an engaging discussion with the winner on **“Sound for Brain Health”**. This event is organized in collaboration with Studium Generale.

October 4, 2024

10:30 AM to 5:30 PM

Van Swinderen Huys

Please join us for the **“Guyot Prize Symposium”** for the awarding of the prize, scientific talks and the keynote address by the winner.

Details & Registration: [Link](#) or QR code

Established in 1914, the **Guyot Prize** is the oldest scientific award given by the University of Groningen. It is awarded every five years on behalf of the Department of Otorhinolaryngology of the University Medical Center Groningen. The prize celebrates exceptional contributions to auditory science and otology and honors the legacy of Henri Daniel Guyot, the founder of the first Dutch school for the deaf in Groningen in 1790. The prize is graciously supported by funds from the Huizinga Stichting.
