2018 Dean's Distinguished Lectureship

Keynote in Psychology

Sound and Brain Health: What have we learned from Music? ...and Concussion?

Nina Kraus, PhD

Professor of Communication Sciences,
Neurobiology, and Otolaryngology
Hugh Knowles Chair, Northwestern University

3:45pm, Thursday, May 24, 2018
Location: Rutgers Academic Building,
Lecture Hall, Rm. 4225

*Reception to immediately follow in the
Hallway Event Space*

Nina Kraus, is a neuroscientist, inventor, musician, and Hugh Knowles Professor of Communication Sciences who advocates for best practices in education, health, and social policy. Studying newborns to adults aged 90+, her research shows how our lives surrounded by sounds—for better (musicians) or worse (injury, hearing loss)—shape how we hear.
